

## A B S T R A C T

## A DEVICE FOR DISPLAYING OBJECTS

5 An object display device comprising a leg (2) and a display panel (1) presenting a mean plane and carrying objects (6, 7) to be displayed on its top face. The display panel (1) can pivot relative to the leg about a pivot axis (y) that is normal to said mean plane, between at least first and second angular positions. The display panel can also be hinged relative to an axis lying 10 between the top and bottom faces of the display panel.
